and Cooking Stoves
of every style and price.

Call before you buy, as we are determined
to give more for the same amount of money than
any dealer in Stoves.

NO. 1, 2, and 3, Broad Street,—Bangor.
HENRY A. WOOD & CO.

Razor Straps and Wallets.

A LARGE assortment of the above articles has
A received, and for sale wholesale or retail at
the lowest cash prices.

ALSO—
A good assortment of Backgammon Boards,
with all the necessary apparatus at

JOHN LOWELL & CO.,

A LARGE lot of Letter Paper, ruled and un-
ruled, of different qualities, for sale very
cheap, by G. R. SMITH & CO.

HINTS FOR THE WARM SEASON.

THIS wonderful compound MEDICAL POWERS ver all other preparations ever formed for the relief of those diseases for which it is recommended, such as Headache, Dizziness, Sleepiness, Nausea in the Head, Bad Taste in the Mouth, Nausea or sickness in the Stomach, Loss of Appetite, Indigestion, Diarrhea, Fever and Aches, Pain after Eating, Sore Stomach, Heartburn, Indigestion, Convulsive Determination of Blood to the Head, Piles, Coughs, Cold, pain in the side, back, hands and joints, Rheumatism all Chronic Diseases, Stereotyped Humors, Salt rheum, and all Cutaneous Eruptions of the Skin, General Debility, &c.

The DANDELION AND TOMATO PANA-
CEA is particularly recommended in cases of In-
digestion and Dyspepsia. The following are some
of its distressing symptoms: Palpitation of the heart, heartburn, loss of appetite, pain after eating, languor, melancholy, restlessness, &c. It will cure the worst diseases of

RHEUMATISM, and will eradicate mercury from the system infinitely faster and better than the common Sarsaparilla preparation. The Dandelion and Tomato Panacea is as all must be aware, from the ingredients of which it is compounded, the best as well as the safest.

Spring and Summer Medicines
new before the public. Spring and Summer are
the seasons when Jaundice Complaints

are most prevalent. The symptoms of these com-
plaints are

Drowsiness, Dimness of Sight, &c.

It has proved itself a most astonishing and effec-
tual remedy for that class of maladies,

The Panacea because it cleanses and enables the stomach to discharge into the bowels, and causes a free circulation and regulates the whole system, and thereby prevents

Humors

of long standing, and in fact it is requisite for the promotion of

Sound Health

from the most exhausted constitutions.

Manufactured only by JAMES KIDDER, Jr., East Boston, and for sale by my appointed agents

BY J. S. HOUGHTON,
No. 130 Washington Street,
BOSTON.

READ THE FOLLOWING.

From the "Western Star," a religious periodical, pub-
lished at Jacksonville, Illinois.

"DOWN'S" VEGETABLE BALASAM EX-
LICIT. We are not in the habit of publishing medicines in our col-
umns, but having used the above medicine in our family
with gratifying results, and being persuaded from all
we can learn concerning it, we consider it an excellent med-
icine for Coughs, Colds, Coughs, & Coughs, Whooping
Cough, Asthma, and diseases of the Chest, and Lungs.
We do not hesitate to give it a cordial notice.

Eliza Duran, an acquaintance of ours, was himself
a sufferer from Consumption, and was thought to be far
gone with the consumption, a disease hereditary in his
father's family. The remedy was the use of restor-
ing his own health, and medicines have turned to his
salutary effects upon themselves and families."

From the "Minnow (Canada) Post," of April 6, 1846.

"REV. N. H. DOWNS' VEGETABLE BALASAM.
EX-LICIT, for all diseases of the Chest and Lungs."

From the "Daily Spy," of Boston, for those who have

made use of this preparation, we can assure them it is

the public with the utmost confidence, in its use and ef-
fectiveness.

The great danger, also, of neglecting some
plague incident to the chest and lungs, should per-
suade every person subject to such complaints to possess

them in their possession.

Gold in Balsam by G. W. LADD and G. W. GUILD, of whom pamphlets may be had giving a full description

of the medicine.

Send for sample at this office.

John S. Sayward,--Editor.

MONDAY, JANUARY 18, 1847.

Bangor--Increase of Population--Manufacturing interests &c.

We mentioned, a few days since, that several beautiful buildings would be erected in our city next season. This has led to some remark, and we learn that although a large number of dwelling houses were erected last season, all are filled, and there is still a demand for tenements. The increase of our population last year has been large. This has been mainly on account of the increase of various shop manufactures. The next season a large number of men will be needed at the mills at North Bangor, which will then be in operation. Our manufacturers already started, will undoubtedly be enlarged, and there are many kinds which might with a little exertion be introduced. There are enormous quantities of shovel handles brought into this city from St. Albans, and shipped to Massachusetts, where iron and steel bladest are put to them, and thousands of them are returned here for sale. Now the labor of making the shovels required for this market may just as well be performed here as in Massachusetts, and far better, indeed, because the transportation would be saved, and because we should thereby observe that essential law of economy and of success, of bringing the producer and consumer into neighborhood, and mutually, in the most advantageous position. A small investment of capital skillfully managed in a little factory upon any of our waterfalls, or driven by steam, for making shovels, would be well remunerated and help advance the real interests of our city.

The manufacture of flour at East Boston will soon make a market for barrels, of hard wood made by modern machinery, and bring into a higher use the products of the hard wood trees in this vicinity. An agent is now on the river seeking a favorable spot for erecting machinery for this purpose.

Recent calculations show that the manufacture of wooden wash boards, required by the market, and which are now almost wholly brought from abroad, would employ seventeen with the necessary machinery. We have the raw material in great abundance. We ought to encourage home industry, and our people, we think, are ready to do so when no one will engage in the enterprise.

A factory here for the manufacture of common wagons, which should employ fifty hands in all the departments, could be sustained if the business were economically managed.

These are only a few of the branches of business which may be successfully pursued here for the supply of our wants.

We have accomplished much within a few years in the way of enlarging our manufacturing business and supplying our own wants. Indeed the skill of our mechanics has enabled them to command very handsome orders from abroad. The largest steam engine operating in the city of Lowell, was manufactured here by Messrs. F. Muzzy & Co—the best Bedlam per-making machine in the State, operating at Saccarappa, was made in this city at the machine works of Messrs. Hinckley & Egery. The excellent hand pumps for ships, manufactured by Mr. J. C. Taylor, have found their way as far as Philadelphia, and been approved when ever introduced. The chain cables made by our neighbor, Mr. Penn, find a ready sale in Boston. But it is unnecessary to enumerate farther. Our people have been doing very well in the way of manufacturing, and can do much more than our institutions are disposed.

In the other day, we transcribed a small portion of a most striking article in the "Courier" of Estate U. S., in relation to our subjects, and have since seen the whole in a rounded into English, and going the rounds of the newspapers. We feel that the necessities of the case will amply demand of us, as long as yet, a further evocation of innumerable portions of our space in this paper. At present we do not know that we can more fully execute this starting point of our article, than in the closing words of the paper itself, from which we have so largely borrowed:

"These speculations which the little municipality of Europe, making at our expense, call for some countering measures on our part. There should be no delay, else will our neighbors, before we are aware, be filled with our wits of the most helpless and hopeless of the European population, crippled, ill and all that, whom they are preparing to thrust upon us."

Forger arrested.

A man named George Hale has been arrested in Paris, Oct. 1, a day by officer Wm. H. Evans of the 10th, charged with committing a forgery under the following circumstances: It would appear as follows: In the month of August last, Hale, in company with another individual, named Loyer, now in the 1st Prison, forged an acceptance for the sum of \$8,000 in the name of Patterson & Williams of No. 12 Nassau street—With this paper Hale went to Albany and purchased a lot of lumber which he shipped for Boston. Hale's conduct awakened the suspicion of the Albany lumber merchants, and they followed him to the city, where it was found that the acceptance was a forged one.

The paper was sent to New York, and the possession of the parish not only remain unbroken, but the share of those who remain is even lessened.

We feel that the necessities of the case will amply demand of us, as long as yet, a further evocation of innumerable portions of our space in this paper. At present we do not know that we can more fully execute this starting point of our article, than in the closing words of the paper itself, from which we have so largely borrowed:

"These speculations which the little municipality of Europe, making at our expense, call for some countering measures on our part. There should be no delay, else will our neighbors, before we are aware, be filled with our wits of the most helpless and hopeless of the European population, crippled, ill and all that, whom they are preparing to thrust upon us."

Thunder and lightning.

On Thursday evening of last week we were visited with a severe fit of thunder and lightning, accompanied with rain—it rained for nearly four hours, the first we had had of any considerable quantity for nearly three months. The weather had been for a few days previous to the storm, very warm.

The lightning on that evening struck the barn of Capt. Benj. Dow, at Dover Lower Village, tearing off the ridge pole, and descended into the barn, killing at the time, three head of cattle and a valuable horse. We have not heard of any other damage being done by the lightning in this vicinity.

Pineapple Farmer.

New Plough.

A French paper informs us that a new plough has been constructed at Vaugirard, Paris, the invention of M. Billot. It is provided with three shares, one or all of which may be used at a time, as the operator or the shares rest on the surface may require.

The trial of this instrument was, it is said, perfectly successful. With this plough a man and a span of horses will easily plough an acre per day.

Says the French account.—"Maine Farmer."

Epigram on the President's Message.

Polk's arguments you say are sound,
It cannot be denied;

Just hear them and 'tis easy found,
They're little else beside.

The mercurial reader and the who, in spite of repeated warnings, have turned deaf ears, or, it may be bitter denunciations, against similar statements heretofore, will remember, that on the above extract, a democratic German editor, in America—in New York,—is speaking of Ger-

many. But to the Burgomaster's "confidential letter,"—the facts in which it is our present purpose to confide, as little as we can, to our friends, and with the space we can devote to it, day, to this end. This letter appears from the "Augsburger," published from the functionary included in, under something like these circumstances. "The importance of the lower classes, it seems, is increasing in many parts of Germany, in a variety of local causes, which a mere history here to enumerate.

The parish of Geisenheim, in the department of Darmstadt, numbers nearly four thousand inhabitants, part of whom are Roman Catholics and part Protestants. Among them, there are people who possess no property, and who, in fact, out of their large families, and if not longer, is able to support themselves, and those who are dependent upon them, has been constantly on the increase. It would, therefore, come to pass that the expenses of supporting the poor in this parish, alone, yearly exceed 2,500 francs. These facts the Director of the geisenheimian official answer which the Burgomaster of Geisenheim sent to the friend of overridders, the burgomaster of the poor in Hill, in the Kingdom of Wurtemberg, on the last of September 1838. The Wurtemberg board of overridders, in the month of Nov. 1838 put the following questions to the Burgomaster, which close:—

"Is it true that Gen. Wool's army had been sent to San Antonio? Is it true that Gen. Wool had joined Gen. Taylor?"

"Is it true that Gen. Wool had crossed the mountains?"

"Is it true that Gen. Wool had crossed the mountains?"

"Is it true that Gen. Wool had crossed the mountains?"

CONSUMPTION CURED!

BUCHAN'S
HUNGARIAN BALSAM
OF LIFE.

THE
GREAT ENGLISH REMEDY

For Colds, Coughs, Asthma,
and other Diseases of the
CHEST and LUNGS.

BUCHAN'S HUNGARIAN BALSAM, the Great English Remedy for Pectoral and Pulmonary diseases, still stands unrivaled and unsurpassed in the most singular agreeable, and effectual cure of these formidable complaints, now known to the civilized world.

Three years of trial in the United States during which time it has been distributed from Maine to Florida, has only served to establish its pre-eminence still more firmly, and its effects are now known throughout the world.

ONLY RELIABLE REMEDY.

In the worst cases of Pulmonary disease, and the best and most agreeable cure of all the slight forms of colds, cough and inflammation, that can possibly be used.

SPITTING OF BLOOD. This frightful symptom of approaching Consumption, in the lungs, or in the heart, or the brain, can be cured by the use of Buchan's Hungarian Balsam, which heals all affected membrane, removes the incipient tubercles, and restores those vital organs, the lungs, to sound and healthy condition.

REDUCING PILLS. The cure of Blood always arises from a tendency to Inflammation, and if not checked, at the outset, will sooner or later, lead to death. A person who raises blood once will raise blood again, unless a proper curative is immediately employed.

EXCITING THE SIDE. This distressing symptom of Consumption arises from inflammation of the heart, or the brain, and can be cured by the use of Buchan's Hungarian Balsam, which heals all the air passages, and restores the incipient tubercles, and restores those vital organs, the lungs, to sound and healthy condition.

REDUCING PILLS. The cure of Blood always arises from a tendency to Inflammation, and if not checked, at the outset, will sooner or later, lead to death. A person who raises blood once will raise blood again, unless a proper curative is immediately employed.

ENGLISH REMEDY. discovered by Dr. Leitchan which is easily vegetable in all ingredients, and perfectly harmless in all its qualities.

LIVER COMPLAINT. In cases of Consumption he liver becomes more and more affected, and also the Spleen, Pleura, and small intestine. Of course, Consumptive patients, Tuberculosis are often found in all these organs, particularly upon the Liver, which also becomes fatty, oily and swelled. The effect of the Hungarian Balsam in diseases of the Liver, especially of an incurable nature, is direct and powerful.

LIVER COMPLAINT. In cases of Consumption he liver becomes more and more affected, and also the Spleen, Pleura, and small intestine. Of course, Consumptive patients, Tuberculosis are often found in all these organs, particularly upon the Liver, which also becomes fatty, oily and swelled. The effect of the Hungarian Balsam in diseases of the Liver, especially of an incurable nature, is direct and powerful.

ENGLISH REMEDY. discovered by Dr. Leitchan which is easily vegetable in all ingredients, and perfectly harmless in all its qualities.

GRAEFENBERG PILLS.

THERE ARE THE MOST CONCERNING REASONS why that class of Medicines denominanted "PATENT," should be made the means of calculable and enduring benefit to the human family. Suppose, for example, that such a valuable talent and resource as the art of Medicine, and great and important experience are brought to bear upon the invention and manufacture of a PILLE. Why not this long devotion to the cause of medical science be crowned with the success that attends the sacrifice of similar talents in other arts? The art of Medicine, and it is the application of the simplest common sense to say that a Pill has produced with so perfect an article as can be made by man. Twenty-five years devoted to any one subject will give a man of ability the mastery over that labor has been bestowed upon the

The subscribers have

the right to vend the article in their city, and offer them to the public with the fullest confidence, that, for Parlers, Chambers, Stores, Halls and Offices, where little or no pipe is to be used, they are superior in point of economy, comfort and convenience, to any other Stove now in the market.
